Expanding Our Educational Horizons

As part of Grifols’ ongoing efforts to reinvest in the people that make our success possible, Grifols Academy of Plasmapheresis is launching the first ever employee college degree program available to all Grifols Plasma Operations (GPO) employees. Currently, only GPO employees are eligible for this benefit. The Academy plans to offer this program to all Grifols employees in the near future.

This new employee benefit provides the opportunity to achieve an associate or bachelor’s degree awarded by College for America at Southern New Hampshire University, a national not-for-profit institution. The fully-accredited degrees are designed specifically to help working adults earn a college education.

The associate degree program will begin September 1st with an application deadline of August 15th. The Communication bachelor’s degree program will begin October 1st, and the Healthcare Management bachelor’s degree program will begin November 1st. Both bachelor’s degree programs have an application deadline of September 15th. For information on if you qualify for the Grifols Tuition Program or College for America requirements, please visit the College for America website at www.CollegeforAmerica.org/grifols.

During July, over 130 participants attended one of eight Academy offerings at our Glendale and Indianapolis campuses, including four sessions of the Advanced PCS2 Machine Repair class, Introduction to Grifols, Quality Assurance 101, and professional development classes offered in conjunction with our Talent and Organizational Development Department.
In addition, 133 eLearning classes were completed for more than 338 hours of instruction. Here’s what some participants are saying about the Academy eLearning offerings:

"Very educational, lots of information."

"It is so important that we are able to have these eLearning classes because we are learning so much. Thanks for these."

"I think these classes are very educational and I hope more co-workers get to take time to view these classes."
